

I am an avid shortwave radio listener and hobbyist and I would like to voice my firm opposition to Broadband over Power Lines. Listening to shortwave is my PRIMARY source of news and entertainment, not the television! If BPL were to be implemented, millions of ham and shortwave listeners would lose this 70+ year old occupation and hobby because of the interference.

In addition to the concern mentioned above, I do not feel that adequate studies have been conducted to determine the detrimental outcomes of BPL.... the environmental consequences and otherwise.

PLEASE DO NOT ALLOW BROADBAND OVER POWERLINES!!!!

Thank you for reading my comment.
